Weekly Report

AU2040260 - Pratham Lalwani

AU2040167 - Daksh Suthar

Tasks performed in the week:

We have studied the Haar Cascade algorithm in much detail and tried to discover the points according to feedback provided by sir. Also, we started to use the LBPH algorithm for face recognition.

Tasks to be performed in the upcoming week:

In the upcoming weeks, we plan to train images and implement the LBPH algorithm for face recognition. Then we will try to store attendance data in a database or CSV file. We look forward to the project's next phase and that we can complete it within the given timeframe.
